I forwarded your email to Jeremy Leggett since I am going to be out for the next 3 weeks. He should be contacting you Monday or Tuesday.

LT Geyer,

I'm on A/L now, but will be in on Monday. However, the site is located between Grants, NM and Gallup, NM. It would be ideal to stay in the Gallup area. Since the request is to drive the GeoProbe from SF to the site, it would make sense to pick up a rental car / SUV in Gallup to use to get back and forth to site.

We will be doing a removal site evaluation (RSE) which should last approximately 11 days. We are planning a 100% radiation scan over a 120 acres, approximately 100 samples and at least 100 GeoProbe vertical radiation scans to access the vertical. We will be using 2 ATVs to do the scan radiation scans.

Personal on site:

- 3 FOSC (1 from region 4, 1 from region 8 and myself
- 1 EPA ERT members
- 1 EPA ERT contractors
- 2 - 3 EPA RPMs to observe / training
- 3 START contractors
- 1 NNEPA
- USCG

We will have a MCP with sat dish to support site ops.

I am looking to have someone with Radiation experience and of course, can assist me with H&S.

If we should talk today to help you plan, I will have some time in a few hours to discuss, otherwise, I'll give you a call on Monday.

Thanks,

Randy B. Nattis
Federal On Scene Coordinator
U.S. EPA Region IX

Subject: Haystack No. 1 - WAF36

Good Morning Mr. Nattis,

I received the WAF for Haystack No.1 AUM and was wondering if you could give me some background information on this site, location, etc. so that I can put in an EPA Request for assistance to the National Strike Force Coordination Center. The more information I have to present to them the better.

In the past you worked with LT Naranjo at the PST. He has now moved to be the Operations Officer at the Coordination Center and I have taken up his position.

v/r

LT Angelique Geyer
Operations Officer
Pacific Strike Team
Hangar #2, Hamilton Field
